Education

University of California, San Diego

Expected Grad: June 2027

B.S. Data Science, Minor in Business

Experience

Associate Product Manager Intern

June 2026 – Present

Visa

Foster City, CA

- Owned zero-to-one development of AI tool that maps data lineage across 1M+ tables in 20 seconds, eliminating manual reverse-engineering for engineers relied on for tracing data, cutting mapping effort 95% for a \$100M data business.
- Conducted user interviews with senior leaders and built end-to-end dashboarding tools using Claude Code, Tableau, and Jira to surface 7M+ underused data assets, assisting leadership to drive decommissioning and cut costs by 50%.

Product Manager Intern

June – August 2025

American Express

Phoenix, AZ

- Launched MVP of an AI Credit API Risk Management System by getting risk, engineering, and API teams onto one definition of scenario severity, turning 100+ ad hoc cases into a prioritized backlog and cutting resolution time 70%.
- Investigated 5K+ recurring API errors in Hive and SQL to isolate failure modes behind most volume for engineering.
- Collaborated with cross-functional API stakeholder teams to define long-term requirements for 1K+ errors.

Software Engineer Intern

May – June 2025

Google (via Break Through Tech)

Austin, TX

- Designed and delivered a BigQuery validation product integrating Gemini AI to auto-generate dataset-specific quality rules, aligning with stakeholder needs and scaling enforcement across 10M+ records for product roadmaps.
- Automated adoption checks with KPIs, cutting data issues by 50% and streamlining QA workflows for releases.
- Created dynamic Power BI data dashboards to measure client usability, improving backlog prioritization by 60%.

Product Development Consultant

February – May 2025

Tesla

San Jose, CA

- Developed ML charger placement tool for 500+ chargers in 3 major cities utilizing Python, Overpass API, and Folium.
- Designed interface to recommend charger placements in 500+ areas and developed a \$3.6B go-to-market strategy.

Product Sales Intern

Jan – May 2025

Renesas Electronics

San Jose, CA

- Led \$100M+ competitive analysis for client to identify high-potential markets for firewall product expansion strategy.
- Analyzed \$1M+/quarter revenue data for client, uncovering supply chain gaps and leading roadmap prioritization.

AI Software Engineer Intern

May - Aug 2025, Jan - June 2026

Sacramento Municipal Utility District

Remote

- Developed first-ever database system for non-technical team, managing 20M+ records, migrating team to Databricks.

Leadership

Product Management Lead

May 2026 - Present

Product Space @ UCSD

- Led 8-week PM fellowship, mentoring 50+ students through product management essentials and interview prep.

Claude Builder Ambassador

Sept 2025 - Dec 2025

Anthropic

- Founded Builder Club on campus for 200+ students and led Claude workshops to build projects with technical literacy.

Projects & Research

JPMorgan Chase Data for Good: National Education Equity Lab Insights | *Python, pandas, seaborn, Matplotlib*

- Won 1st place at JPMorgan Chase's invite-only Data for Good hackathon by leading product development of an analytics tool that turned student data into actionable insights for the National Education Equity Lab.

The Evolution of Virtual & Augmented Reality | *C++, C, Swift, Kotlin, Java*

- Published research with Niantic Labs' co-founder on VR/AR user experience (2k+ downloads), analyzing cross-platform simulation trade-offs across Swift, Kotlin, and Java to inform product design strategy and influence future adoption.

Technical Skills

Languages: Python, Java, SQL, R, C, HTML/CSS, JavaScript

Technologies/Methodologies: JIRA, Confluence, Figma, Tableau, Microsoft Office Suite, Excel, Agile, Scrum

Product: Product Strategy, Data Analysis, Process Improvement, Customer Relationship Management, Market Research
